

# New Caledonia – Certification Requirements

---

These instructions establish and implement a procedure which will assure national uniformity in the completion and issuance of the USDC SIP Export Health certificate unique to the product and shipment to New Caledonia for computer-based certificates.

## General

- There are 3 Export Health Certificates for New Caledonia unique to the type and presentation of the fishery product:
  - New Caledonia Mollusc
  - New Caledonia Crustacean
  - New Caledonia Fish

## Requests for Inspection:

Whether received by e-mail, telephone, fax or in writing, the information requested on NOAA Form 89-814, Request for Inspection Services, must be obtained from the applicant. If a written request contains the information necessary to perform the inspection, a NOAA Form 89-814 needs to be completed by SIP personnel prior to performing the inspection. The written request or NMFS-completed NOAA Form 89-814 will be filed with the file copy of the certificate as part of the permanent record.

## Completing the Export Health Certificate:

The certificate is prepared by transferring to it the pertinent information taken from its accompanying request and observations made during the inspection. In the case of HACCP QMP facility, the information will be provided by the requesting firm. All certification should be done via the NOAA SIP online certificate system. Only as an option when the system is down or unavailable is a PDF version issued. The directions below are guidance for both the system completion and the PDF certification for information required in fields located on the documents.

The certificate will be printed on official USDC watermarked paper only.

## General instructions for Completion of the New Caledonia Export Health Certificates

1. Choose appropriate Export certificate for unique product and presentation of product.
2. Ensure specific attestations listed on certificate have been met for each consignment.
