

Serbia - Certification Requirements

The Republic of Serbia has adopted the certification and import requirements in place for the European Union (EU); however, Serbia is not a member of the European Union.

Consult the [European Union certification requirements](#) for certification of product exported to Serbia.

Serbia has elected to use the EU model health certificate with public and animal health attestations. All intentions of the attestations must be met including Approved Facility listings and raw material sourcing requirements. Serbia is not a participant of the Veterinary Equivalence Agreement between the US and EU, therefore all product exported to Serbia, require physical inspection.

If the product is produced in a USDC HACCP QMP facility a Lot inspection is not required. All documentation verification must still be done for each consignment. If the product is produced in a USDC resident inspection facility or a non-contract facility, physical consignment by consignment inspection is required prior to certification.
